

Advantages

Membership in the Virtual Institute is open to all organizations active in research, education, and business related to artificial electromagnetic materials and metamaterials.

- Possibilities to participate to the research workshops and meetings of the metamaterials leading experts in Europe to discuss perspective research directions and to get immediate access to the recent research results by the VI members. (METAMORPHOSE non-disclosure agreement and Internal Regulations should apply).
- Possibility to plan and prepare effectively your participation to European projects on metamaterials to avoid any possible conflict of interests, resource wasting and efforts overlapping via reliable networking with other VI members using the information sharing and proposal preparation principles agreed within the METAMORPHOSE community.
- Possibilities to find partners for future proposals and research avoiding related Intellectual Property Rights risks. (METAMORPHOSE non-disclosure agreement and Internal Regulations should apply)
- Opportunity to promote your research and to become a partner in the proposals originated by the VI and other VI members.

- Possibilities to use VI managerial support for organizing and running international joint research projects.
- Possibility to get help from the VI experts, technical and/or financial support from the METAMORPHOSE VI and its sponsors in organization of your local events devoted to metamaterials.
- Possibility to access other VI members measurement, characterization, computation and fabrication facilities on a non-for-profit base (reimbursement of the expenses only)
- Discounts on participation to the VI events like METAMATERIALS Congress, METAMORPHOSE PhD schools and local events organized by the VI members.
- Free usage of the the METAMOPHOSE databases like metamaterials
- literature list
- conference and courses list
- European facility list on measurements, characterization and fabrication
- researchers contact details list

- Possibility to instantly publish and update information on your recent achievements on metamaterials community website www.metamorphose-eu.org.
- Free or discounted access to the online courses on metamaterials and their applications.
- Free advertising of job vacancies available at your institution to the targeted audience.
- Access to the specialised electronic communication facilities on metamaterials like forum and chat rooms.
- Free subscription to the VI newsletter.
- Free advertising of your local events on metamaterials organized by your institution or with your participation.
- Free use of electronic web-based tools for joint research work.

Also, we provide opportunity for informal communication, socialising and networking between the partners. For this purpose the VI targets to conduct and sponsor regular meetings and workshops (the number of the real meetings is

defined by the VI General Assembly).
